PROFILE SUMMARY

High-ownership Computer Science student experienced in turning ambiguous ideas into structured execution plans. Comfortable operating across growth, analytics, and operations in fast-moving environments. Strong at diagnosing broken processes, building clarity from noise, and driving initiatives from zero → shipped with measurable outcomes. Interested in learning how high-performance AI organizations scale from the inside.

EDUCATION

Vellore Institute of Technology – Bachelor of Technology, CSE (Health Informatics) *Sep 2022 – 2026*

CGPA: 8.16/10.0

CORE COMPETENCIES

Strategy & Execution: Structured Problem Solving, Ownership, Cross-Functional Coordination, Process Optimization
Growth & Analytics: SQL, Excel, KPI Tracking, Dashboarding, Cohort Analysis
Sales & CRM: Lead Qualification (BANT), Sales Funnel, CRM (LeadSquared/HubSpot), Cold Outreach
Systems Thinking: Workflow Design, Operational Structuring, Documentation Systems, Feedback Loops
Collaboration: Communication & Collaboration: Client Communication, Pitching, Objection Handling, Accountability

EXPERIENCE

Generative AI Virtual Internship – Google Cloud *2025*

- Translated loosely defined AI workflow problems into structured execution steps and implementation plans.
- Diagnosed inefficiencies in retrieval pipelines and proposed performance improvements.
- Built documentation and experiment tracking systems to improve clarity and repeatability.
- Executed iterative refinements independently with minimal supervision in a fast-paced environment.

PROJECTS

AI-Powered Documentation Assistant (Operational System Build) - *Python, Database Integration*

- Identified operational friction caused by fragmented internal knowledge systems.
- Designed end-to-end Designed an end-to-end solution focusing on usability, speed, and real-world impact.
- Targets researchers and operational teams handling large volumes of documents.
- Solves inefficient search and fragmented data by delivering quick, context-aware insights.

Retail Sales Analytics & Growth Diagnostics - *SQL, Data Analysis*

- Broke down unstructured sales data into actionable cohort and revenue insights.
- Built KPI dashboards to support structured decision-making for growth initiatives.
- Diagnosed revenue concentration risks across customer segments.
- Converted analysis into GTM-aligned recommendations with measurable business focus.

AI-Based Alzheimer's Detection (Team-Led Execution)

- Led a 4-member team coordinating data preprocessing, experimentation, and validation cycles.
- Structured the development roadmap to deliver a reliable and scalable diagnostic solution.
- Targets healthcare providers and caregivers needing early and accurate Alzheimer's detection.
- Owned final reporting, documentation, and submission process (Springer publication accepted).

LEADERSHIP & INITIATIVE

- Took ownership of ambiguous academic and technical assignments without predefined execution paths.
- Structured deliverables and ensured milestone completion across collaborative projects.
- Built clarity in team environments by documenting processes and defining next-action steps.
- Demonstrated bias toward action by prioritizing outcomes over task formalities.

CERTIFICATIONS

- Google Cloud – Generative AI Virtual Internship
- AWS Academy Graduate – Cloud Foundations
- Languages: English (Fluent), Hindi (Fluent), Japanese (Learning)
